# Plastic is Non- Biodegradable

Plastic is widely used because it is of low cost, versatile and durable.

Bacteria is not able to degrade plastic. That makes plastic **non-biodegradable**.

A single plastic bag can take 1,000 years to degrade!

# Plastics Waste Stays

Every day, people are throwing away tons of plastic cups, containers and other plastic items.

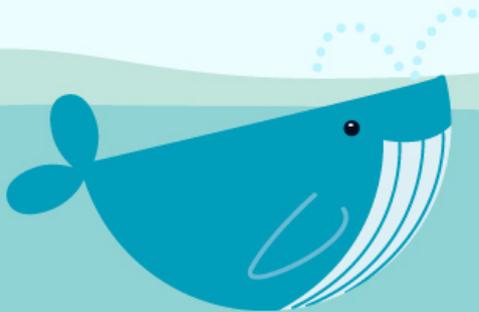

Among the worst forms of plastic pollution is **Styrofoam**.

Styrofoam never fully degrades. Tiny pieces of it stay in our environment and pollute oceans and rivers.

# A Costly Mistake

For a bird, a fish or a turtle, it's easy to mistake a small piece of plastic for food – especially when there are millions of pieces of plastic floating in our rivers and ultimately our oceans.

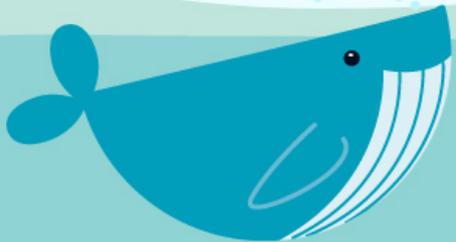

# A Costly Mistake

When sea turtles, seabirds and marine mammals eat plastic pieces, these pieces stay in their stomachs and block their digestive tracts. As a result, animals starve to death.

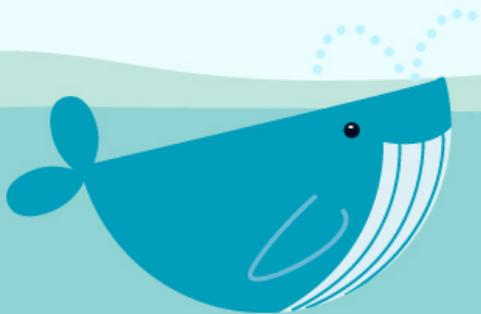

Toxic chemicals in plastic can also harm animal and human health.

# Reducing Plastic Waste

We need to reduce plastic waste to save our world. We can ...

- Reduce the use of Plastic
- Recycle Plastic Items

# Reducing Plastic Waste

Reduce the use of plastic straws, even in restaurants. Purchase a reusable stainless steel or glass straw

# Reducing Plastic Waste

- Use a reusable bag instead of using too many plastic bags.
- Purchase or make your own reusable bags.
- Bring them when you go grocery shopping with your family.

# Reducing Plastic Waste

- Use a reusable bottle or mug for your drinks.
- Instead of using Styrofoam, pack your lunch in reusable containers.
- Drink fresh fruit juice or eat a fruit instead of buying juice in plastic bottles. It's healthier and better for the environment.

# When we Recycle Plastic...

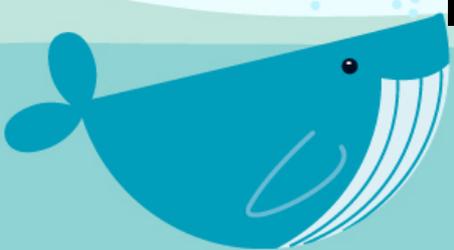

- We save money and energy
- We reduce the amount of plastic in the landfills or seas
- We reduce the amount of greenhouse gas emissions that are created during the production of plastic.

Put your used plastic items in the recycling carts and bins in your neighbourhood.

We also have recycle bins for plastic in school.

Let's do  
our part to  
Save Our  
World  
Today!
