Curriculum Framework

3 BROAD OBJECTIVES

IN THE TEACHING AND LEARNING OF MTL TO DEVELOP PROFICIENT LANGUAGE USERS

MOE's educational goal is **to support and enable every student to learn MTL to as high a level as each student is able to.**

Communication

- Valuable skill for life and work
- In addition to their mastery of the EL, proficiency and ability to communicate in MTL gives Singaporeans a competitive edge

Culture

- Learning MTL enables our students to understand and develop their unique identity through a deeper appreciation of culture, traditions and literature and history
- Critical base to preserve the transmission of cultural values and traditions associated with each MTL in our society.

Connection

- Proficiency in MTL enables our students to connect with communities across Asia and the world who speak that language or share that culture.

2024 Primary MTL curriculum Framework

- The New Primary MTL Curriculum implemented in 2024 **builds on the strengths of the 2015 curriculum**.
- The new curriculum places greater focus on helping students to **experience the joy of learning MTL**, so as to motivate them to like and learn MTL for life.

Our desired student outcomes “Joyful Learning, Confident User” describe our aim for MTL learners to experience **the joy of learning MTL**, help them **become confident users** through three curricular goals:

- a. **Language Competence**
- b. **Culture & Values**
- c. **21CC**

Learning Experiences Language & Cultural Exposure

Mother Tongue Fortnight

Promotes cultural awareness and appreciation of Mother Tongue languages and culture through fun and engaging activities.

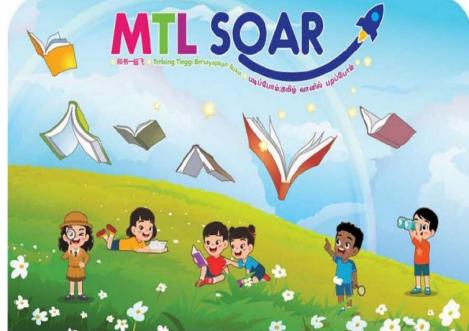

SOAR Reading Programme

Cultivate positive reading habits in students from young.

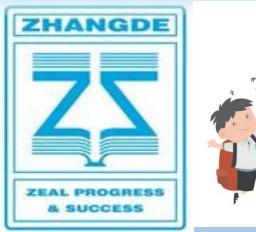

- ✓ Class Reading period- 1 period weekly for reading and related activities
- ✓ Use of Small Readers- in sync with the new primary MTL curriculum.

Spark interest, Open minds, Appreciate cultural roots, Rise as a bilingual reader

Conversational Chinese and Malay (CCM)

Promotes cross-cultural understanding, encourages students to develop conversational skills in a third language, prepares young Singaporeans for a globalised future and strengthen Singapore's identity as an open, diverse and cohesive society

MTL – Paper 3 (Oral)

Reading Aloud

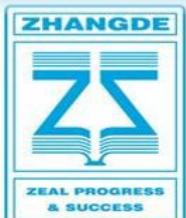

- Short passage

Picture Description and Conversation

- Picture related to a theme – e.g. family

Example:

1. Share with me what you have seen in the picture. (Description)
2. Share one activity that you have done with your family.
(Conversation)

Parental Support

Supporting your child in MTL Learning

Cultivate the love of reading MTL books, e.g. visit the library or borrow e-books

Encourage them to take small steps in learning MTL, e.g. read signs, listen to music

Do fun activities in MTL together, e.g. watch a film or performance

Provide a conducive environment for learning MTL, e.g. access to MTL music and books

Key Features of P3 & P4 HMTL Curriculum

Built on existing MTL curriculum:

Sustain students' interest and deepen their knowledge in their MTL

Enhance Reading and Writing skills

Expose students to age-appropriate literary texts

Literary-based text. Incorporation of age-appropriate literary-based text to provide an enjoyable early experience to ethnic literature.

Exposure to higher-order thinking exercises e.g. Enhance reasoning skills by eliciting students' response during classroom activities and discussions; Construction of new knowledge by making meaningful connections between texts and students' lives.

Creative and fun-filled activities and games to teach language and cultural knowledge. To sustain interest and extend knowledge.

heart

How would assessment look like for HMTL at P3 and P4 level?

HMTL at P3 and P4 will be reflected as a non-weighted assessment. Non-weighted assessment refers to assessments where the scores will not form part of the computation of a student's overall results in a subject for the year. There will be no changes in the major exams.

Student's progress in HMTL will be reflected in the Holistic Development Profile.

Syllabus Content (Practices)

Practices of Science

Set of established procedures and processes associated with scientific inquiry

Demonstrating WOTD		
Investigating	Evaluating and Reasoning	Developing Explanations and Solutions
Posing questions and defining problems	Communicating, evaluating and defending ideas with evidence	Using and developing models
Designing investigations	Making informed decisions and taking responsible actions	Constructing explanations and designing solutions
Conducting experiments and testing solutions		
Analysing and interpreting data		

How scientific knowledge is generated and established

Understanding NOS
Science is an evidence-based, model-building enterprise to understand the real world.
Science assumes natural causes, order and consistency in natural systems.
Scientific knowledge is generated through established procedures and critical debate.
Scientific knowledge is reliable, durable, open to change in light of new evidence.

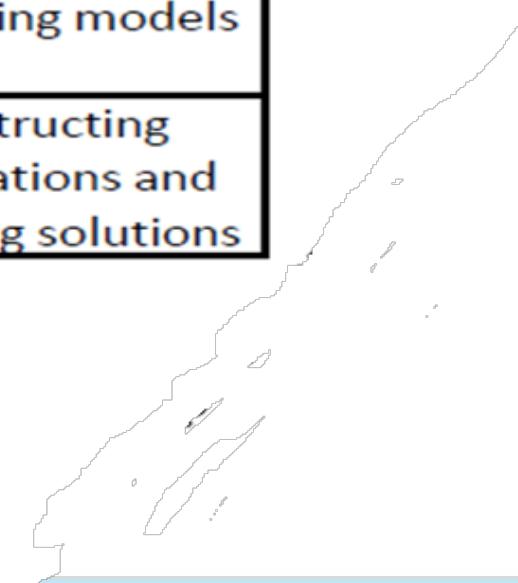

Relating STSE
There are risks and benefits associated with the applications of Science in society.
Applications of Science often have ethical, social, economic and environmental implications.
Application of new scientific discoveries often drive technological advancement while advances in technology enable scientists to make new or deeper inquiry.

Application of Science in society

Textbook
through multimodal representations and applications to daily life

SPARKLE Kits
through manipulatives and game

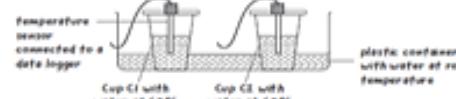

Activity Book
through hands-on learning

Let's Inquire

Part A: In which cup would hot water remain hot for a longer time?

1. Prepare the set-up as shown below.

Be careful when handling hot objects.

2. Predict in which cup, C1 or C2, the hot water will stay hot for a longer time.

3. Observe the temperatures of the water in cups C1 and C2 over 15 minutes. Record your observations in the table below.

Time (min)	Temperature of the water in cup C1 (°C)	Temperature of the water in cup C2 (°C)
0		
5		
10		
15		

SLS

through videos, interactives and quick checks

A screenshot of the SLS platform. It shows a 'Quick Check [Heat Flow]' section with a question: 'How do the temperatures of the two blocks change?' Below it is a simulation where users can drag sliders to change the temperatures of two blocks, A and B, and observe the heat flow between them. The simulation includes a graph showing temperature over time and a diagram of two blocks in contact with a thermometer between them.

Parental Support

- Trigger curiosity in the things around children by **asking them questions**
- Connect/Relate Science to the things around us
- Visit different places to **experience & observe** living & non-living things
- e.g. Botanical Gardens, Mount Faber, Science Centre, SEA Aquarium, Hort Park.
- Encourage children to read Science Books.

Environment Education @ Zhangde

- Zhangde – aims to inculcate a love for the Environment in all our students. We also want our students to care for the Environment.
- Some highlights
 - ❖ Setting up an Environment Corner
 - ❖ P3 My Environment and I Curriculum
 - ❖ Practising recycling Paper and Plastic bottles
 - ❖ Commemorating International Biodiversity Day
- ❖ **We seek our Parents' support in all these initiatives.**

Learning Support Programme

For selected students :

English Language

- ❖ School-based Dyslexia Remediation (SDR)
- ❖ Reading Remediation Programme (RRP)

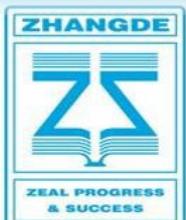

Mathematics

- ❖ Learning Support for Mathematics (LSM) programme
 - Specialised early intervention to students who need more support in acquiring basic numeracy skills.

Mother Tongue Languages

- ❖ Mother Tongue Support Programme (MTSP)

- Specialised early intervention programme to build stronger foundation in students' oracy and literacy skills
